

Answer) Difference between electronic and digital Signatures are:-

- Electronic Signature (ES) is a digital form Signature, legal and secure. Digital Signature (DS) is an electronic Signed Signature and works with public key infrastructure by registration.
- ES validation is not by any trusted authority while DS is validated by trusted Certification authorities.
- ES is not tamper proof and cannot show if tampered while DS is highly secure and can show tamper evidence.
- ES is any kind of image attached to the document for identity and consent; DS is encrypted for identity.
- ES is used for Verification purpose only while DS is primarily for securing documents.
- ES is not authorised while DS is authorised.
- ES is less secure while DS is highly secure.
